MUSIC enhances the skills needed  
to learn SCIENCE and MATH

Help NURTURE the creativity  
needed by our science-based economy

**SUPPORT**  
our music and science programs  
for kids

and together let's make a difference  
in a child's life

**FanFaire FOUNDATION**  
where SCIENCE and MUSIC intersect  
[www.fanfairefoundation.org](http://www.fanfairefoundation.org)

**FanFaire**  
**FOUNDATION**

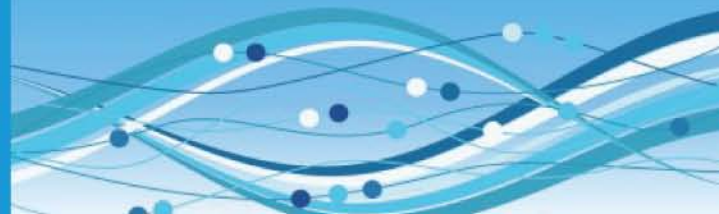

where SCIENCE and MUSIC intersect

...unleashing the power of music to  
**NURTURE CREATIVITY,**  
fire up the scientific imagination, and  
exalt the human spirit.

"I would teach children music, physics, and philosophy;  
but most importantly MUSIC,  
for the patterns in music and all the arts  
are the keys to learning."  
- Plato

"The theory of relativity occurred to me by intuition.  
And MUSIC is the driving force behind this intuition.  
My new theory is the result of MUSICAL perception.  
If I were not a physicist, I would be a musician."  
- Albert Einstein

"History shows that the sciences and technology  
have never flourished in the absence of  
a similar flourishing of the arts."  
- Robert S. Root-Bernstein

# FanFaire FOUNDATION...

...is an all-volunteer 501(c)(3) nonprofit organization founded in 2009 by professionals with strong backgrounds in the sciences and a passion for music and the arts. Its **MISSION** is to nurture through music the kind of creativity badly needed in our highly competitive science-based society.

Its **PROGRAMS**, funded primarily by small individual donations, aim to INSPIRE, INFORM, ENLIGHTEN and ENTERTAIN. They include concerts, lectures, science festival demonstrations, and after-school activities that supplement music and science education at the K-12 level, equip young minds for the unique challenges of our knowledge-based economy, and enkindle public interest in music and science.

While **MUSIC** is obviously not rocket **SCIENCE**, history has shown that it can make rocket science possible. Indeed, the biographies of great scientists reveal that music is the common thread that ran through the lives of the great creative geniuses who made the landmark discoveries of our time, Albert Einstein being the foremost exemplar.

Usually free and open to the public, FanFaire Foundation's programs are held in informal learning environments in communities throughout San Diego County, often in partnership with public libraries, museums, festivals and other institutions that advance the cause of education.

## "KIDS Playing For KIDS"

Warmly received by the community when it launched in late 2011, the Foundation's "KIDS Playing For KIDS" program has become its most popular.

The program nurtures musically gifted children (ages 6 to 17) who also love science and math in the hope that they can serve as role models for other children. It provides them with performance opportunities at various venues throughout the year, and alongside professional artists whenever possible, enabling them to creatively express and share their love of music with children of all ages while building their self-confidence as performers. In addition, they are encouraged to pursue excellence in their studies and value community service.

To date the Foundation has presented more than twenty "KIDS" concerts. The events are always a big hit with audiences who come away awed by the kids' amazing talent and convinced of the program's value to the community. In November 2012, the program released its debut CD album entitled "Classical N Jazz".

Plans are underway to expand the program's presence in schools and underserved communities.

*"I love for my children to see greatness in other kids. It shows them what is possible when talent is combined with hard work."* - a parent at a "KIDS Playing For KIDS" performance

*"I find FanFaire Foundation's concerts to be an amazing testimony to how children can reach the zenith of their potential when they are given the proper amount of support, encouragement and most of all - love."*

- Dominic Pizarro, 16-year old pianist, founding member of "KIDS Playing For KIDS" and a college student majoring in Aerospace Engineering

**OUR VISION**  
communities reaching new heights  
through our programs in **MUSIC and SCIENCE:**  
KIDS Playing For KIDS  
KIDS teaching KIDS  
Free Family Concerts  
Parents Playing With Kids Competitions
